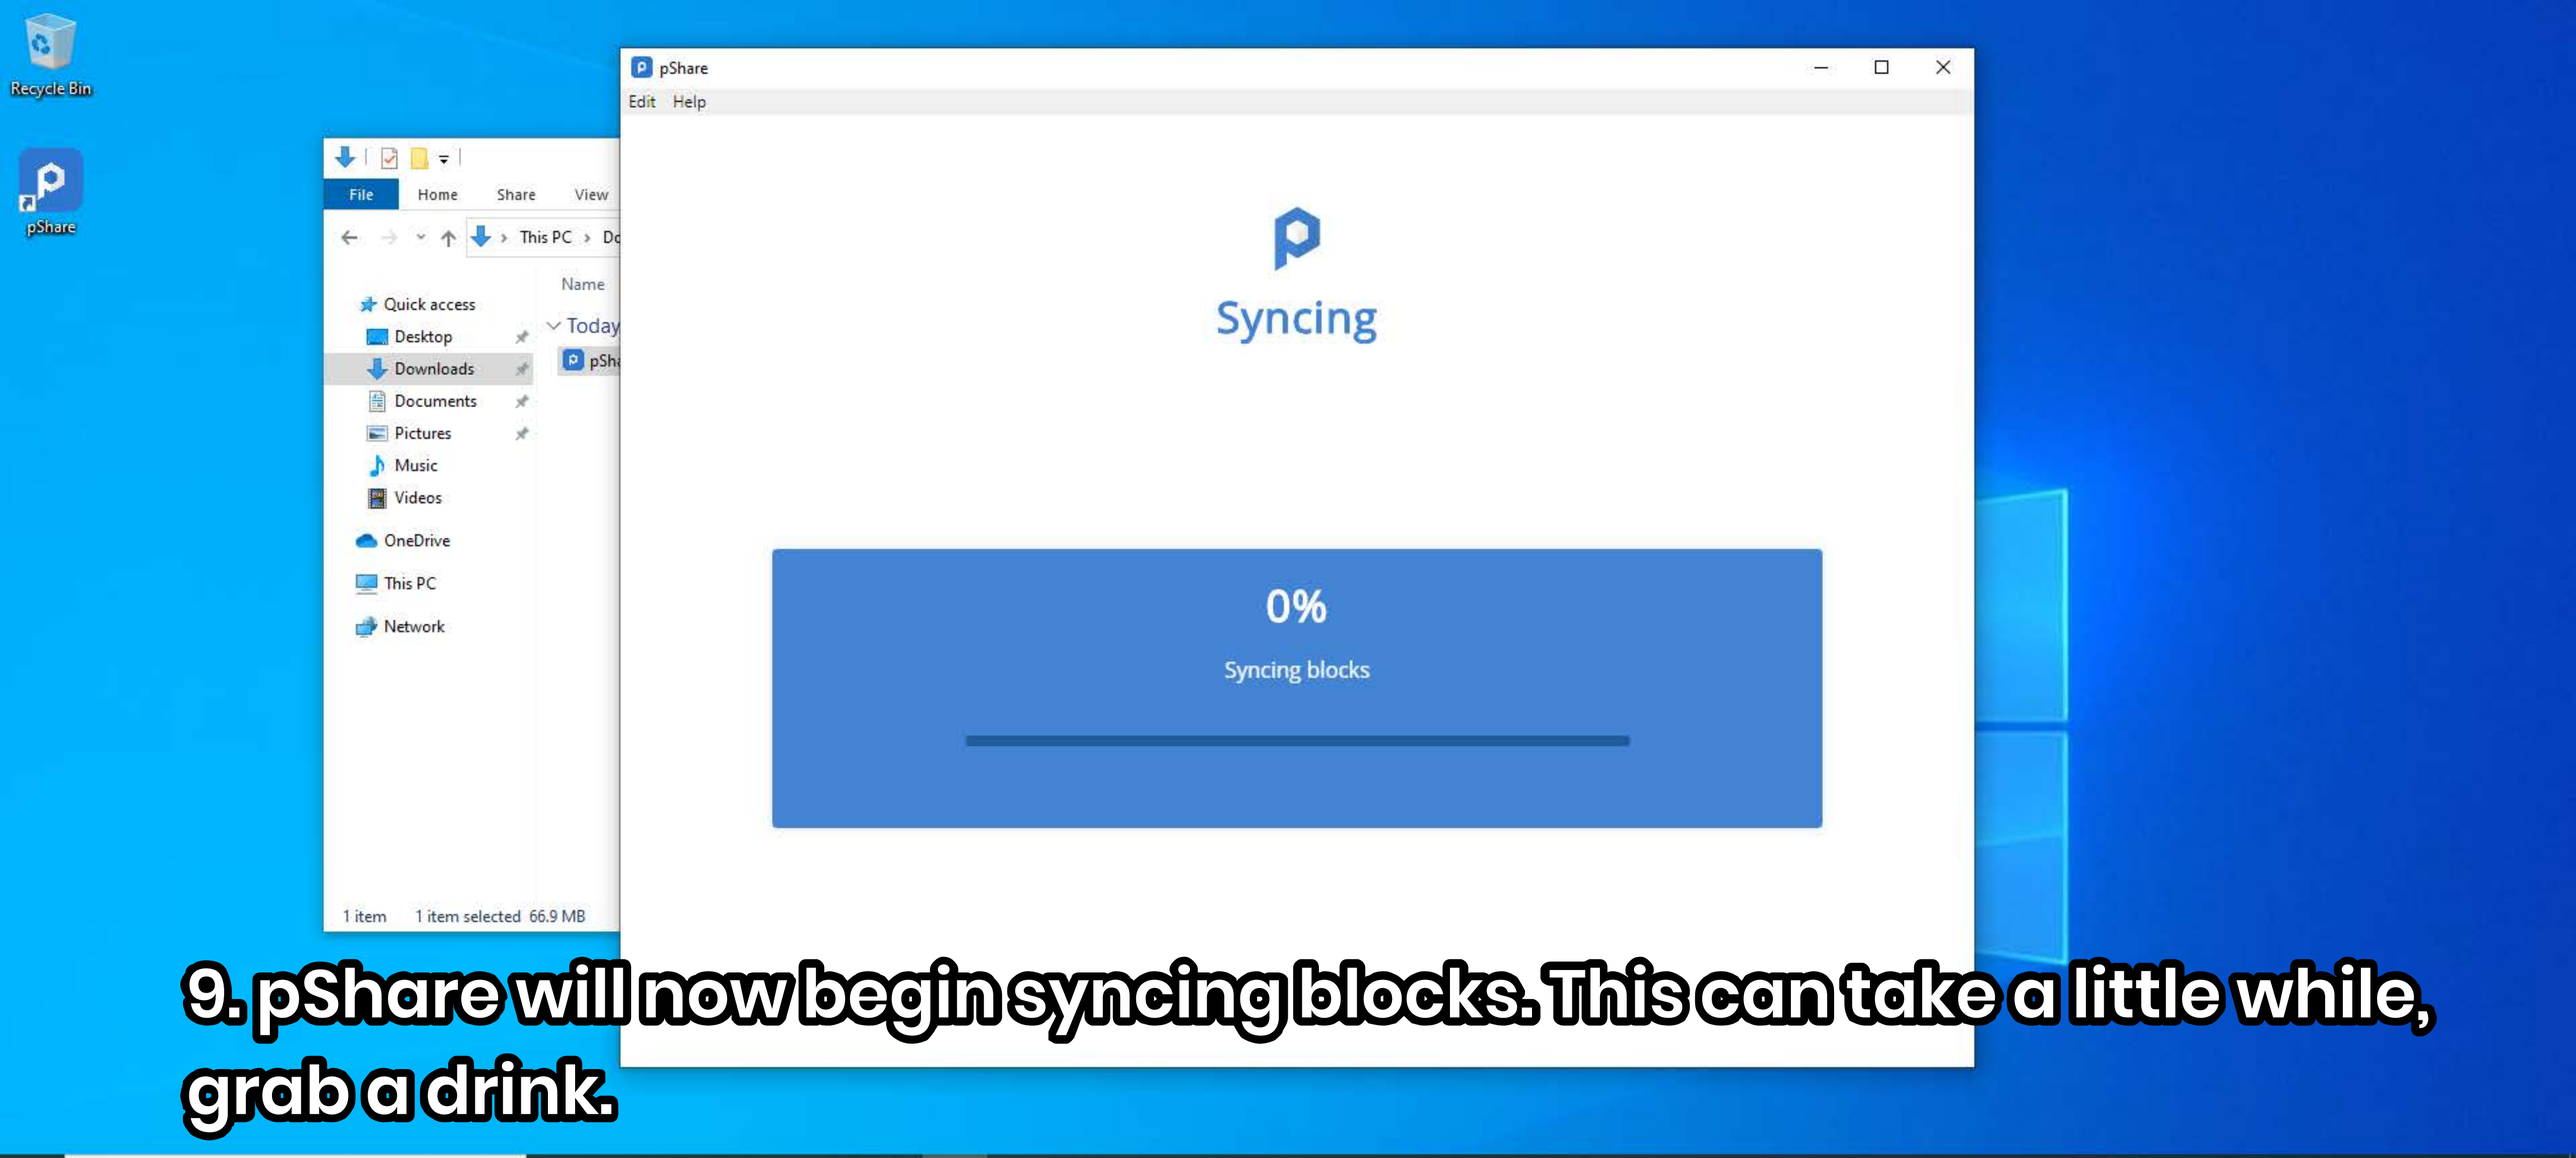
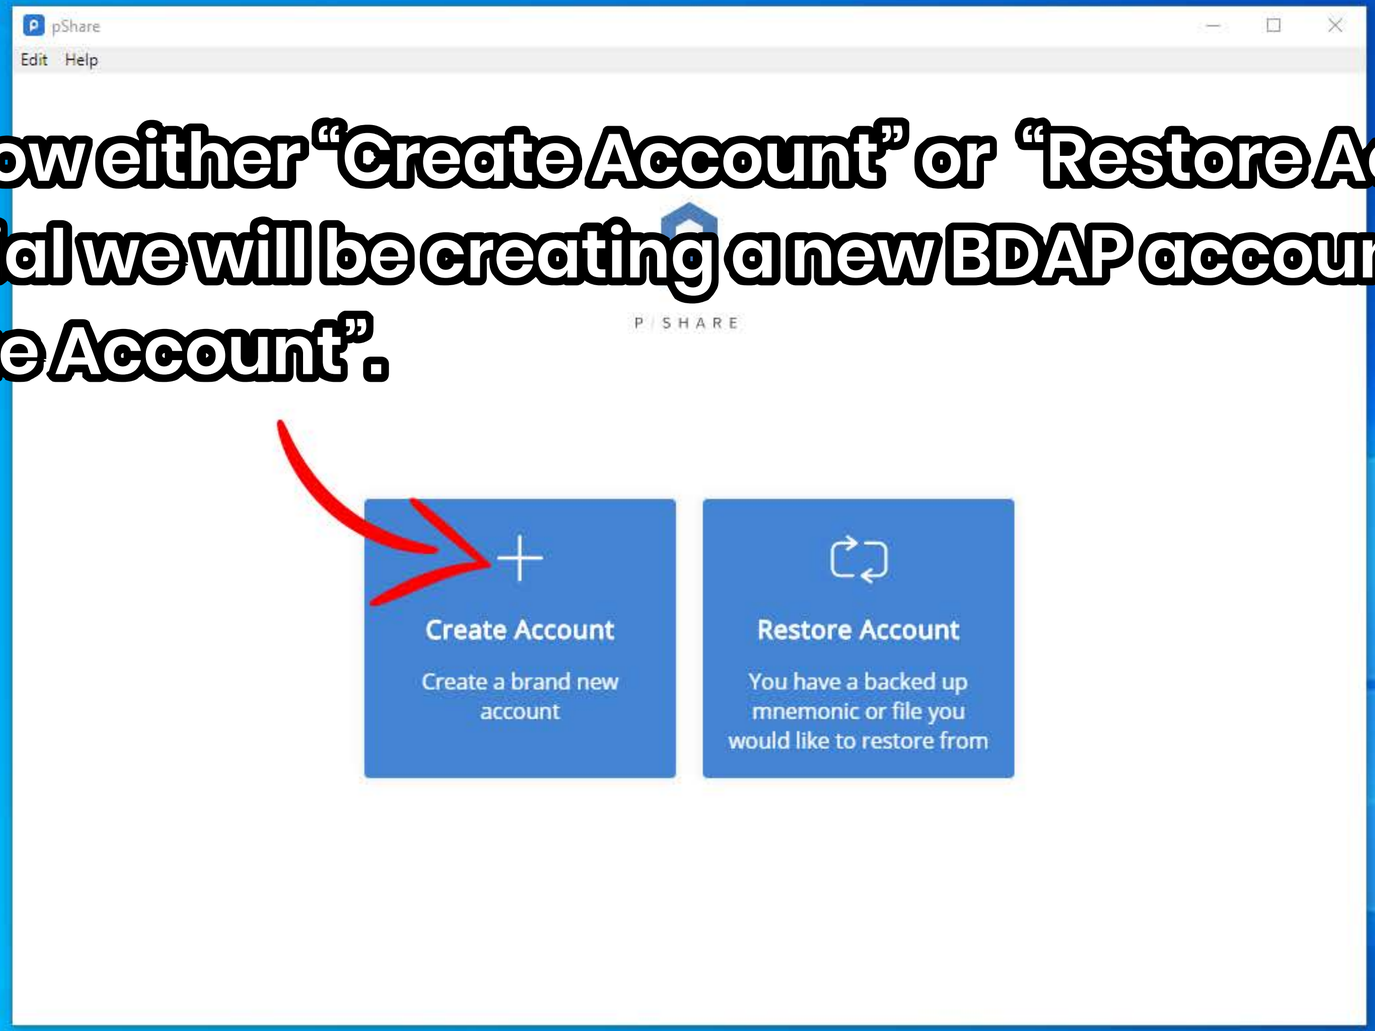
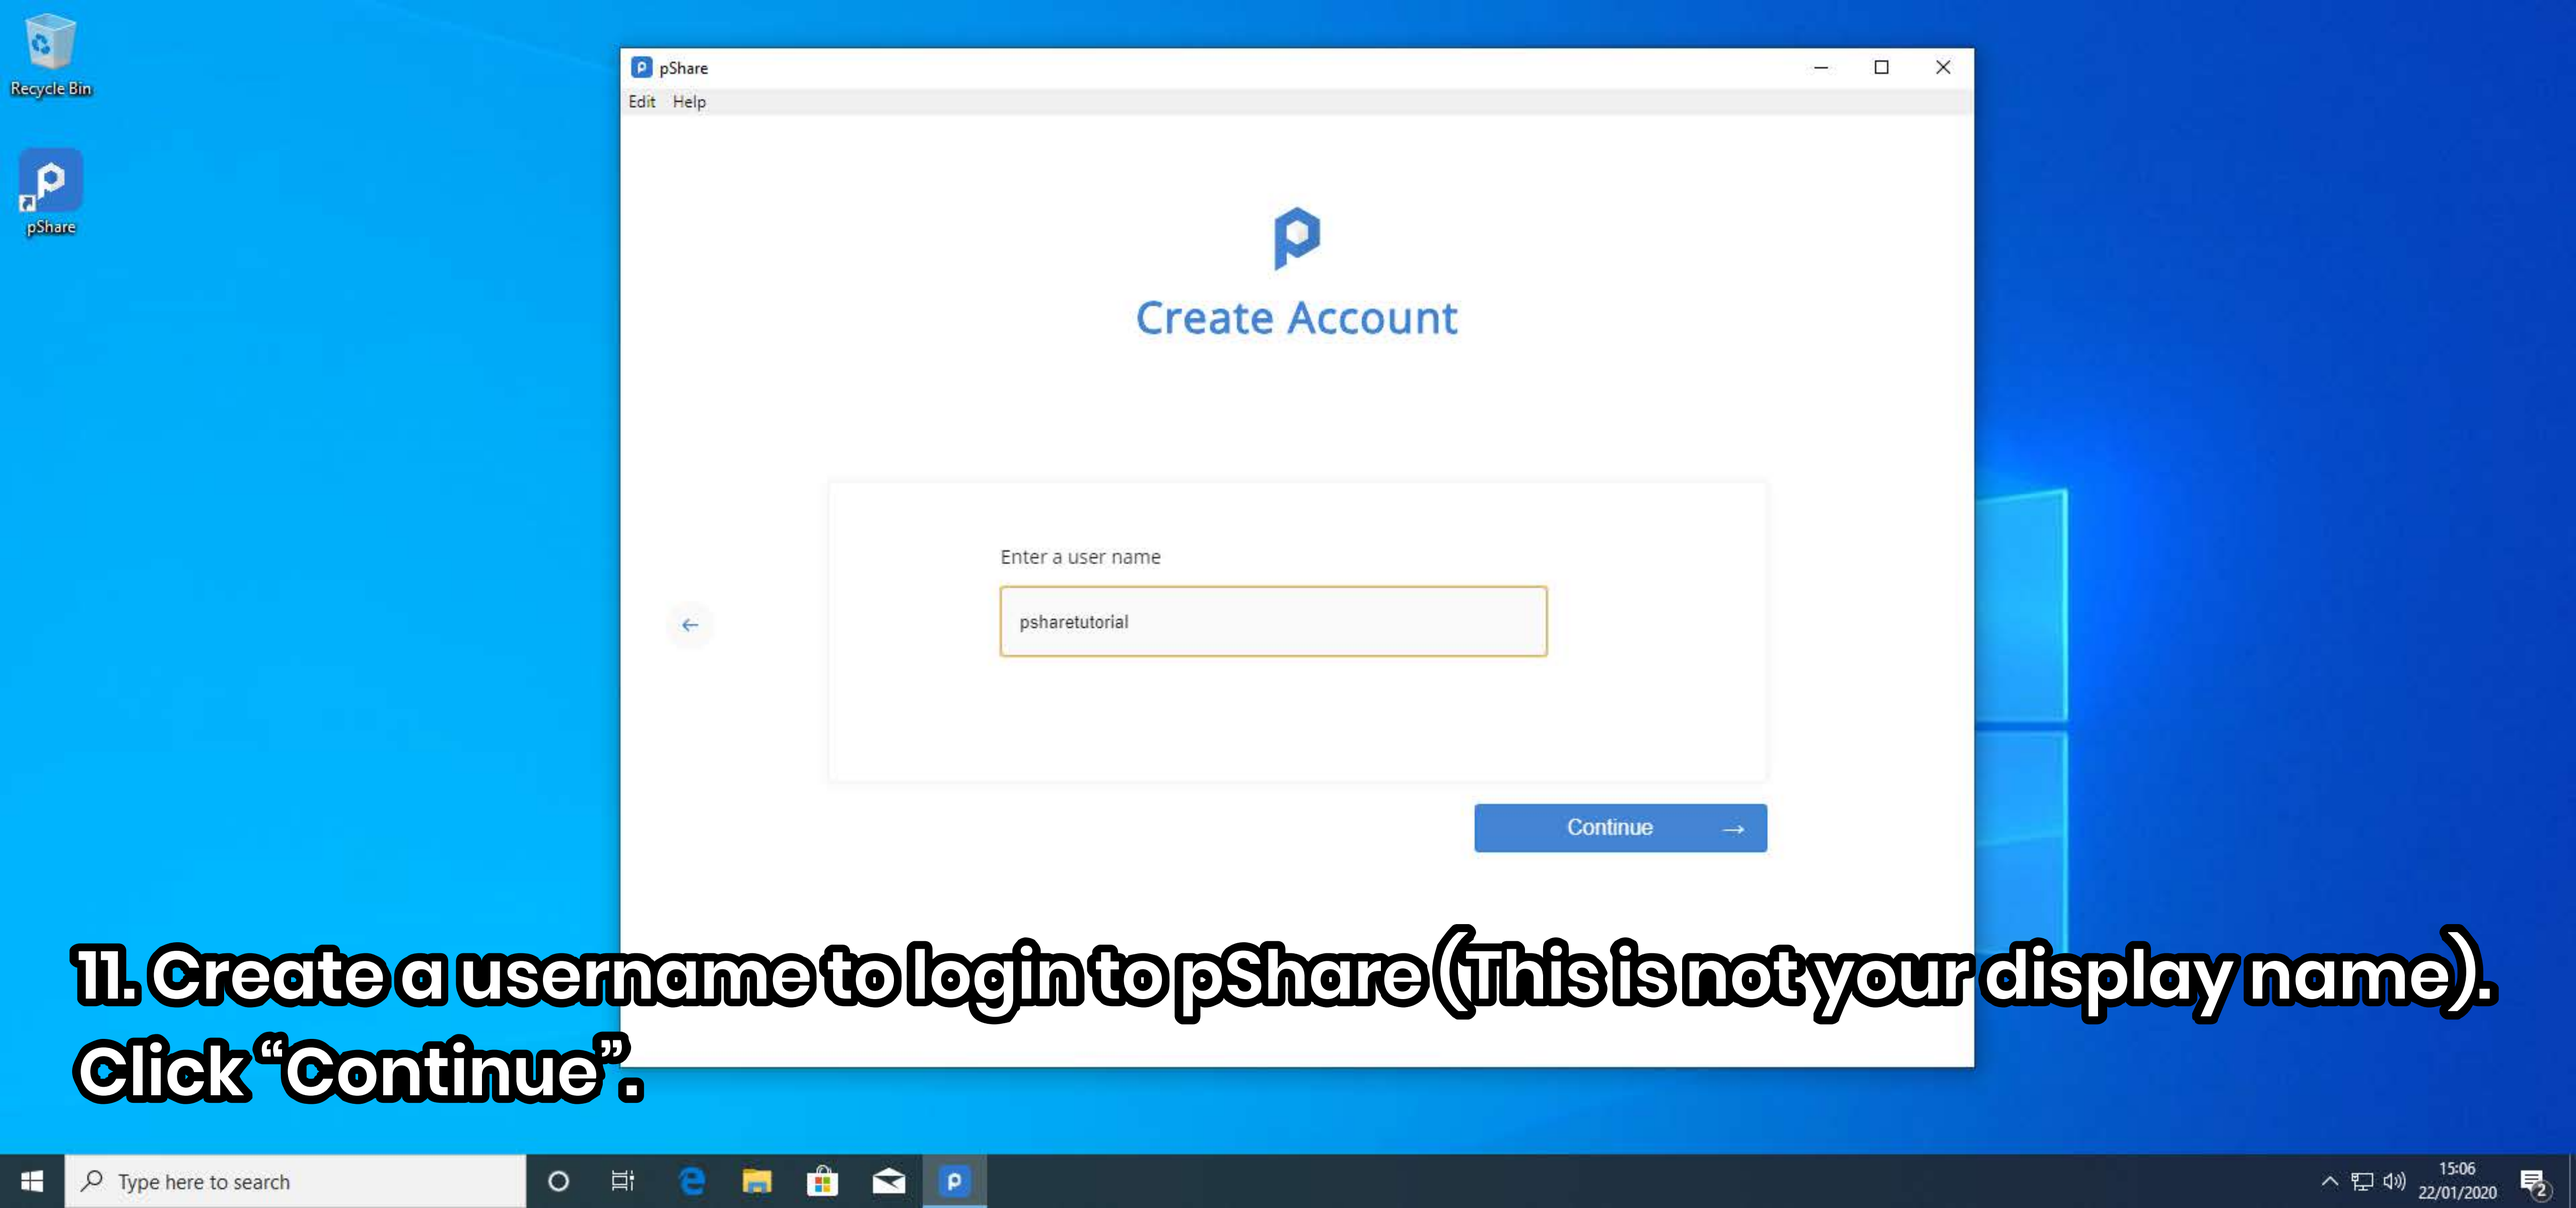
8. On Windows you will be next presented with Firewall options for pShare, it is recommended to tick the boxes for both Private and Public, this will allow you to use pShare on a LAN. Click “Allow Access”.



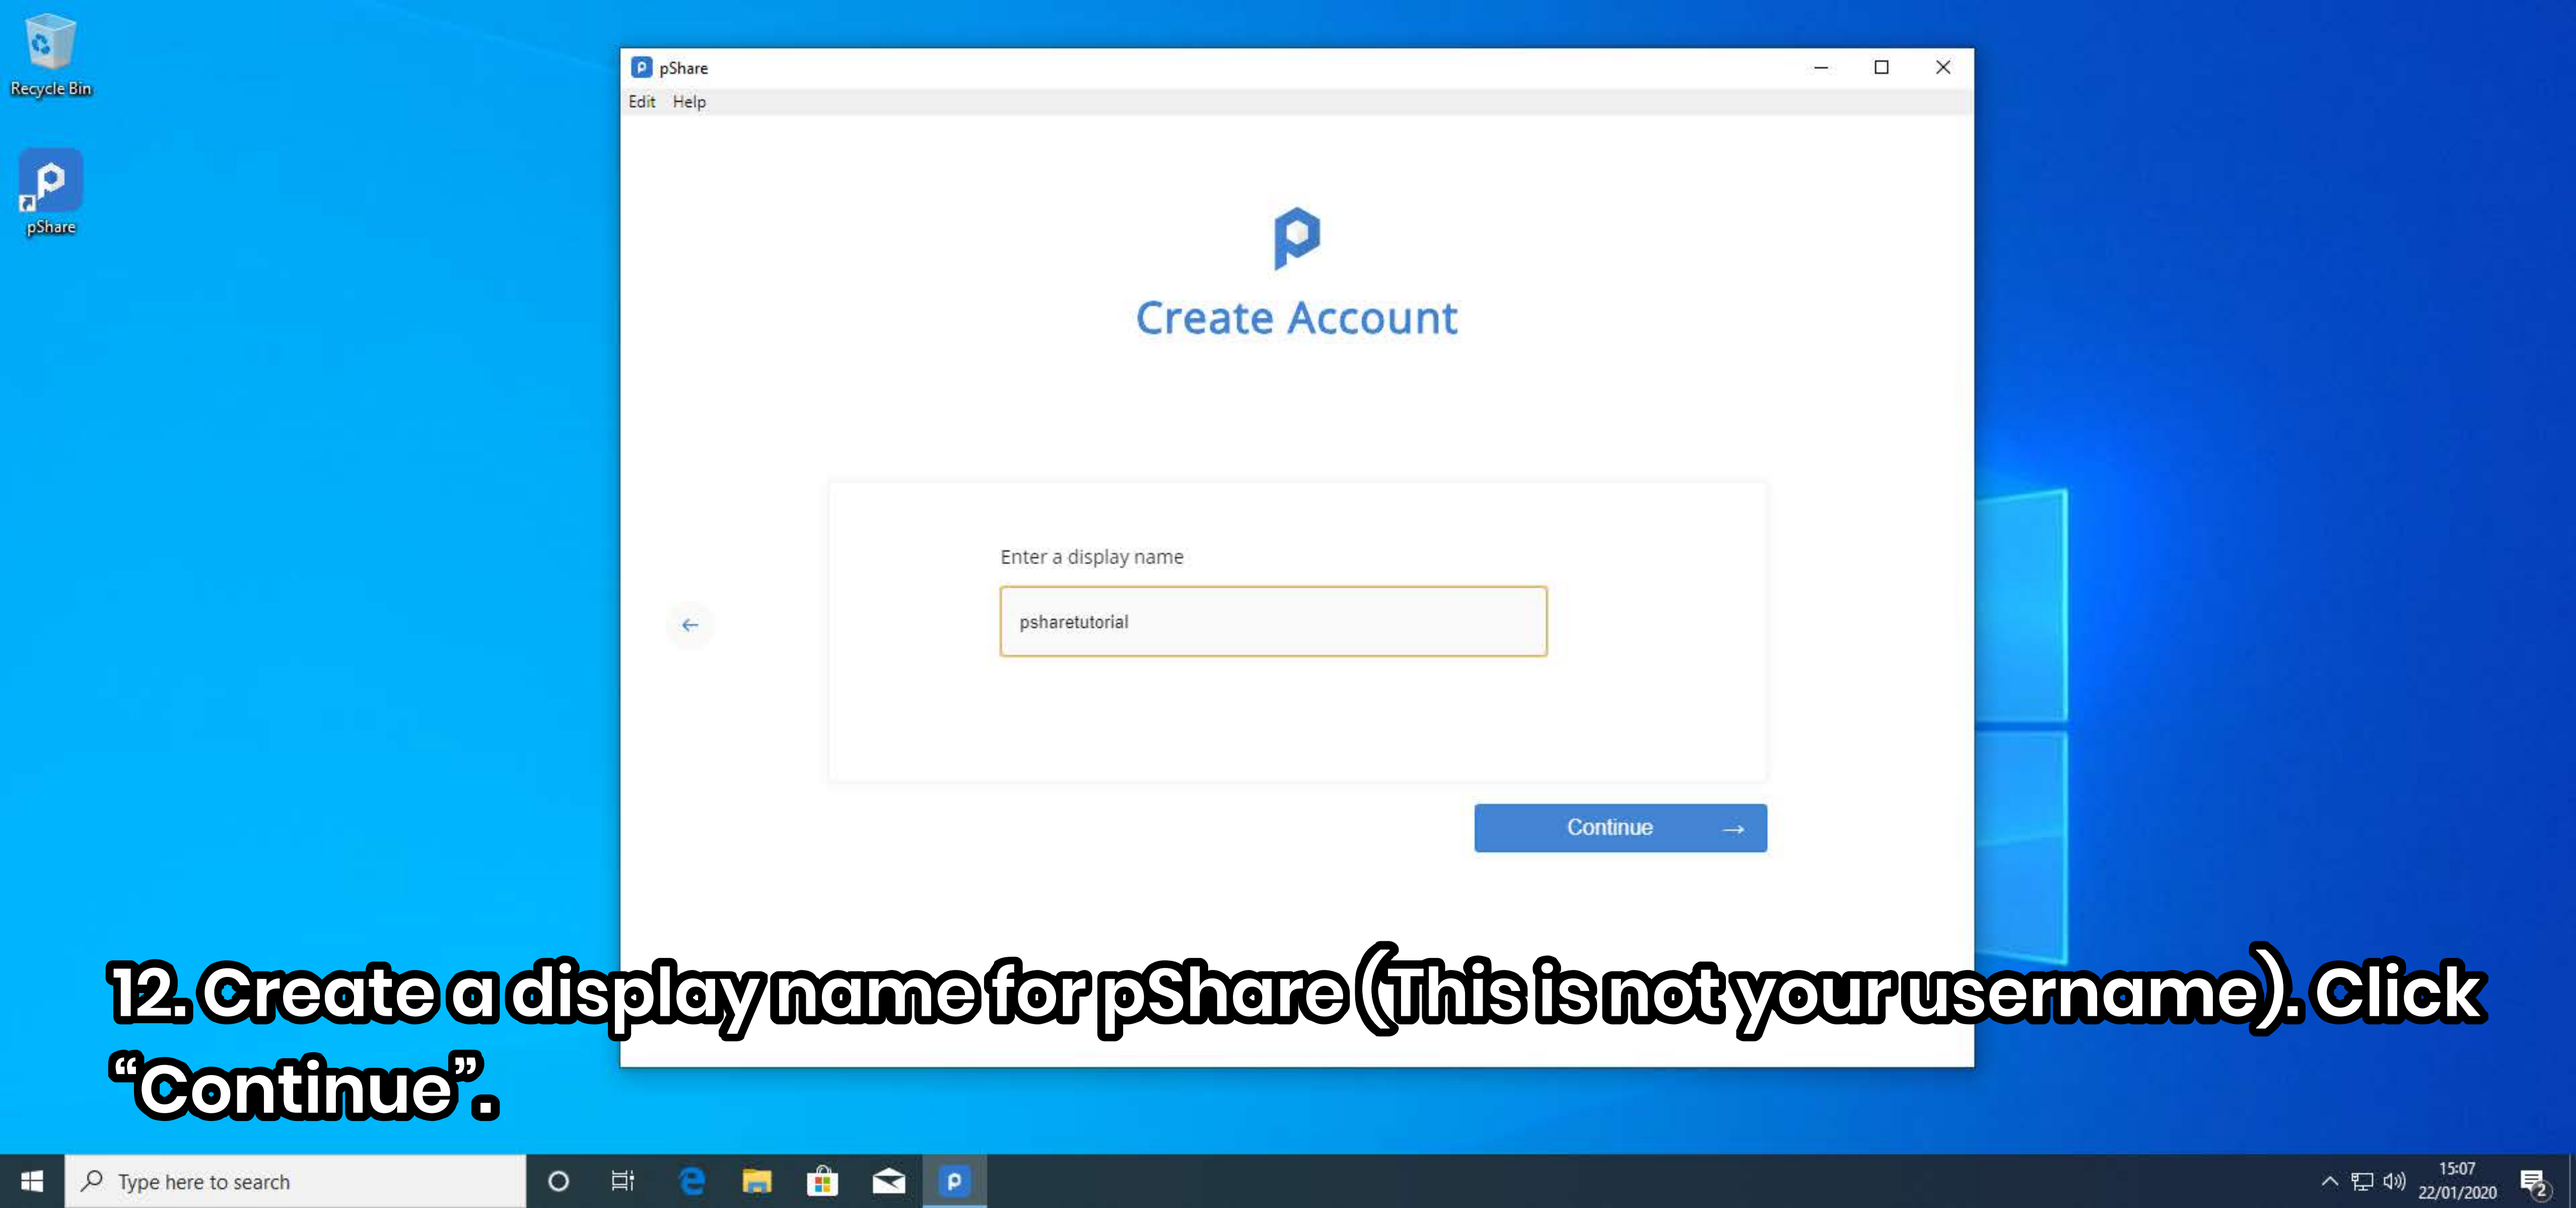
9. pShare will now begin syncing blocks. This can take a little while, grab a drink.

10. You can now either “Create Account” or “Restore Account”. For this tutorial we will be creating a new BDAP account for pShare. Select “Create Account”.





11. Create a username to login to pShare (This is not your display name). Click “Continue”.



12. Create a display name for pShare (This is not your username). Click "Continue".
