Sequence Bootstrap Instructions

1. To use the bootstrap first close your Sequence wallet and navigate to your Sequence data directory and BACKUP THE DATA DIRECTORY SOMEWHERE SAFE:

- **Windows:** c:\users\\appdata\roaming\Sequence\
- **Linux:** ~/.Sequence
- **OSX:** ~/Library/Application\ Support/Sequence

** Replace <username> with your username.*

2. Delete all data apart from your wallet.dat, conf files and backup folder.

3. Download the bootstrap.dat to the Sequence data directory:

Windows

- Download the latest bootstrap -
<https://duality.solutions/duality/bootstraps/seq/bootstrap-latest.zip>
- Unzip and place contents in C:\users\\appdata\roaming\Sequence\

Linux

- Open terminal.
- Type "cd ~/.Sequence && wget
<https://duality.solutions/duality/bootstraps/seq/bootstrap-latest.tar.gz> && tar -
xvf bootstrap-latest.tar.gz" and hit enter.

OSX

- Open terminal.
- Type "cd ~/Library/Application\ Support/Sequence && wget
<https://duality.solutions/duality/bootstraps/seq/bootstrap-latest.tar.gz> && tar -
xvf bootstrap-latest.tar.gz" and hit enter.

** Replace <username> with your username.*

4. Start Sequence and import from bootstrap.dat:

4a. Qt users just need to start the wallet.

4b. Daemon users need to use the "-loadblock=" argument when starting Sequence, for example:

- **Linux:** -loadblock=~/.Sequence/bootstrap.dat
- **Windows:** -
loadblock=c:\users\\appdata\roaming\Sequence\bootstrap.dat
- **OSX:** -loadblock=~/.Library/Application\ Support/Sequence/bootstrap.dat

** Replace <username> with your username.*

5. Grab a coffee, tea or other preference of beverage and relax.
